

Boulder Emotional Wellness

Date and Time: 1/19/2025 3:20 PM

Clinician: Holly Trienens, Intern

Supervisor: Erica Johnson

Patient: Allison Field, DOB 2/14/1993

Diagnosis

F41.1 Generalized anxiety disorder

Diagnostic Justification

Allison described feeling anxiety about making decisions and overthinking things geared toward the future. This shows up more with life changing decisions. Current decisions on the table are pregnancy, future family changes with addition of a child, and where to live. All of these are creating anxiety in Allison. She finds herself ruminating or obsessing over decisions or avoiding them.

Presenting Problem

Allison is experiencing anxiety around decision making, planning for future, and over thinking.

Treatment Goal

Decrease Allison's anxiety when considering major life decisions.

Objective 1

Client stated goal: "Focus on proactive ways and practical techniques I can use to find clarity/ease about challenges in my relationships and big life choices/changes as we build a family." Progress will be reported by Allison.

Estimated Completion: 6 months (7/19/2025)

Treatment Strategy / Intervention

- Mindfulness Training; Modality: Individual Therapy; Frequency: Every other week; Estimated Completion: 6 months (7/19/2025).
- Relaxation/Deep Breathing; Modality: Individual Therapy; Frequency: Every other week; Estimated Completion: 6 months (7/19/2025).
- Supportive Reflection; Modality: Individual Therapy; Frequency: Every other week; Estimated Completion: 6 months (7/19/2025).
- Guided Imagery; Modality: Individual Therapy; Frequency: Every other week; Estimated Completion: 6 months (7/19/2025).
- Exploration of Relationship Patterns; Modality: Individual Therapy; Frequency: Every other week; Estimated Completion: 6 months (7/19/2025).
- Exploration of Emotions; Modality: Individual Therapy; Frequency: Every other week; Estimated Completion: 6 months (7/19/2025).
- Exploration of Coping Patterns; Modality: Individual Therapy; Frequency: Every other week; Estimated Completion: 6 months (7/19/2025).
- Cognitive Reframing; Modality: Individual Therapy; Frequency: Every other week; Estimated Completion: 6 months (7/19/2025).

Objective 2

Dress: Appropriate

Motor Activity: Unremarkable

Interview Behavior: Appropriate

Speech: Normal

Mood: Euthymic

Affect: Congruent

Insight: Excellent

Judgment/Impulse Control: Excellent

Memory: Intact

Attention/Concentration: Good

Thought Process: Unremarkable

Thought Content: Appropriate

Perception: Unremarkable

Functional Status: Intact

Risk Assessment

Patient denies all areas of risk. No contrary clinical indications present.

Medications

None. Taking prenatals.

Subjective Report and Symptom Description

Allison came in with anxiety related to her in-laws and upcoming baby.

Objective Content

Allison was in-person for session.

Therapist held space for Allison to share her anxiety around in-laws visiting after baby comes. Allison shared.

Therapist provided feedback on her drafted text to her mother-in-law. Allison was open to the feedback. Therapist reflected the fear present concerning this topic. Allison softened into the fear and stepped away from a sense of control. Therapist modeled communicating with her partner about the topic. Allison expressed agreement with the approach. Therapist reframed the outcome options. Allison settled into this expansive truth.

Risk Assessment

Patient denies all areas of risk. No contrary clinical indications present.

Medications

None. Taking prenatals.

Subjective Report and Symptom Description

Allison was feeling anxious about her baby being head up and needing to make a decision about an ECV. She was feeling overwhelmed, disappointed, and sad today. She was moving through the grief of losing her choice of her ideal birth plan.

Objective Content

Allison was in-person for session.

Therapist held space for Allison to share about the update in her pregnancy journey. Allison shared her experience, her overwhelm, and her emotions.

Therapist guided Allison to notice what was happening in her body. Allison named the tension in her jaw and belly area. Allison invited the parts that were present to be named. Allison named feeling sad and disappointed and her part that tries to stay positive. Therapist invited Allison to make space for the sadness. Allison did and deepened into the sadness and grief.

Therapist provided a perspective shift of Allison's husband's view. Allison relaxed into this shift and agreed. Therapist provided reassurance. Allison brought in a sense of release and surrender.
